

.... If you are having a problem downloading and installing the Teensyduino-0018.exe when you have Norton AntiVirus running here is one possible fix.

This little bugger popped up when trying to download the Teensyduino-0018.exe

I selected the View Details link to see this:

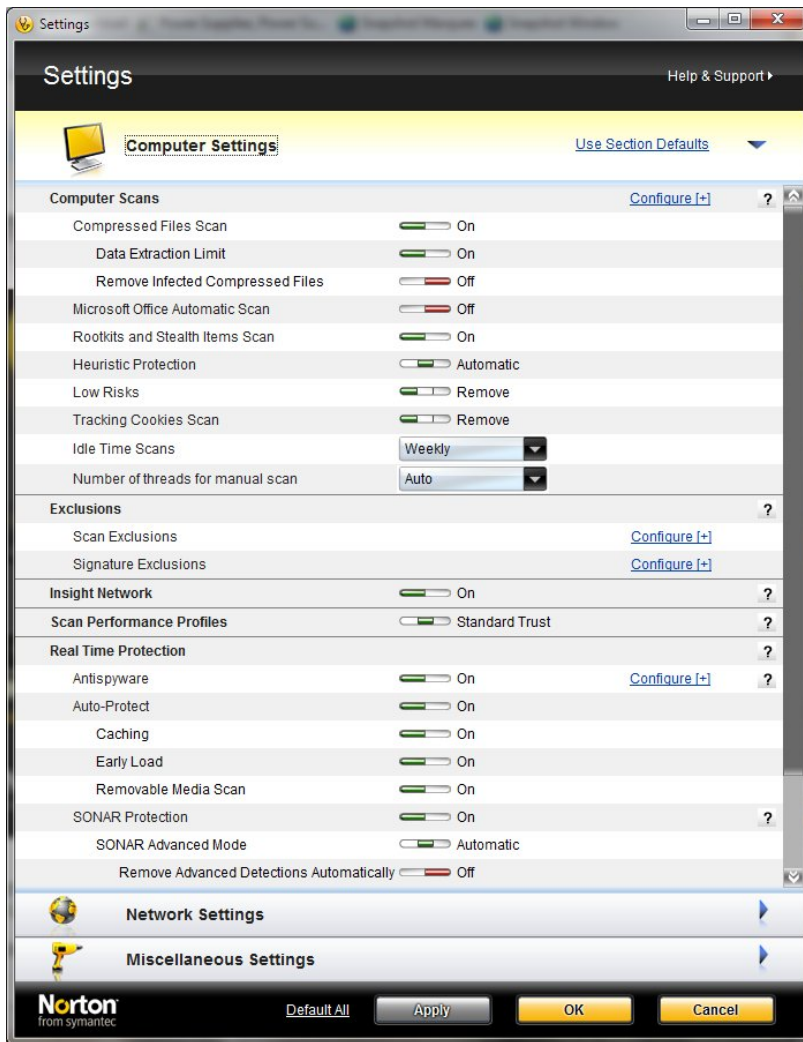

Ah, a false positive.

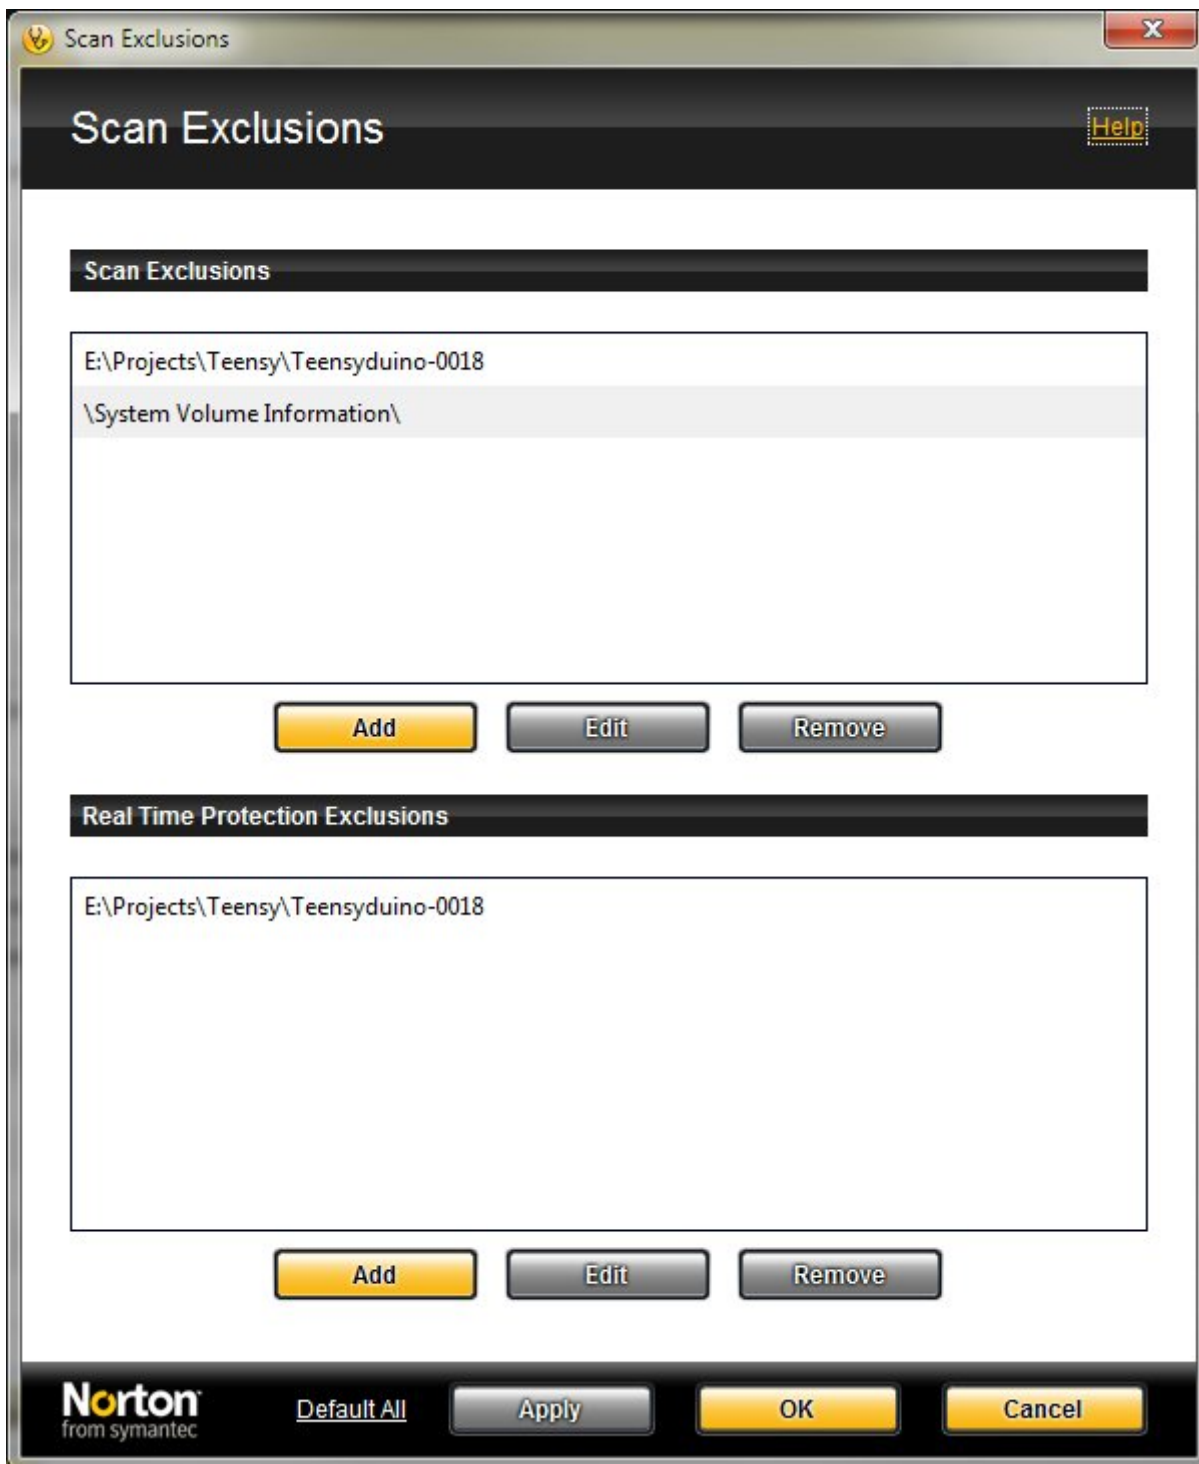

So I fired up the main Norton AntiVirus software and selected "Settings" in the Computer section below.

Then in here under Exclusions -> Scan Exclusions i selected the "Configure" link.

I then added the directory where I want the file to be downloaded to in the "Scan Exclusions" box, and then entered the same information in the "Real Time Protection Exclusions" box.

I clicked "OK" a bunch of times to conclude my session with Norton. I then downloaded and installed the software without a problem.
